How to use QR Codes

- 1) In order to read a QR code, you must have a QR Code Reader app installed to your device. Visit Google Play, Blackberry App world, or App Store; most QR scanning apps are free. Any app that can read barcodes should be able to process QR codes.
- 2) Run the app. Your screen will switch to a camera display. Point your camera to a QR code. Hold your camera steady so that the QR code comes into focus. Try to fill the frame as much as possible with the code to speed up the reading process.
- 3) Access the content. You will be directed to the conference evaluation webpage.
- 4) Complete the evaluation and select “Submit”.
